

§ 800.87

7 CFR Ch. VIII (1–1–04 Edition)

on the inspection certificate: “Loaded under continuous official inspection.”

[55 FR 24042, June 13, 1990; 55 FR 46131, Nov. 1, 1990; 56 FR 4675, Feb. 5, 1991; 57 FR 58965, 58970, Dec. 14, 1992; 61 FR 18490, Apr. 26, 1996; 63 FR 20056, Apr. 23, 1998; 64 FR 6783, Feb. 11, 1999]

§ 800.87 New inspections.

(a) *Identity lost.* An applicant may request official personnel to perform a new original inspection service on an identified lot of grain, or on an identified carrier or container, if the identity of the lot or the carrier or container has been lost.

(b) *Identity not lost.* If the identity of the grain or the carrier or container is not lost, a new original inspection shall not be performed on the same identified lot of grain or carrier or container in the same assigned area of responsibility within 5 business days after the last official inspection.

[50 FR 49674, Dec. 4, 1985]

§ 800.88 Loss of identity.

(a) *Lots.* Except as noted in paragraph (d) of this section, the identity of a lot of grain shall be considered lost if (1) a portion of the grain is unloaded, transferred, or otherwise removed from the carrier or container in which the grain was located at the time of the original inspection; or (2) a portion of grain or other material, including additives, is added to the lot after the original inspection was performed, unless the addition of the additive was performed in accordance with the regulations and the instructions. At the option of official personnel performing a reinspection, appeal inspection, or Board appeal inspection service, the identity of grain in a closed carrier or container shall be considered lost if the carrier or container is not sealed or if the seal record is incomplete.

(b) *Carriers and containers.* The identity of a carrier or container shall be considered lost when (1) the stowage area is cleaned, painted, treated, fumigated, or fitted after the original inspection was performed; or (2) the identification of the carrier or container has been changed since the original inspection was performed.

(c) *Submitted samples.* The identity of a submitted sample of grain shall be

considered lost when (1) the identifying number, mark, or symbol for the sample is lost or destroyed or (2) the samples have not been retained and protected by official personnel as prescribed in the instructions.

(d) *Additives.* If additives¹ are applied during loading to outbound, including export, grain after sampling or during unloading to inbound grain before sampling for the purpose of insect or fungi control, dust suppression, or identification, the inspection certificate shall show a statement showing the type and purpose of the additive application, except that no statement is required to be shown when the additive is a fumigant applied for the purpose of insect control.

[52 FR 6495, Mar. 4, 1987, as amended at 58 FR 3212, Jan. 8, 1993; 59 FR 52077, Oct. 14, 1994]

WEIGHING PROVISIONS AND PROCEDURES

§ 800.95 Methods and order of performing weighing services.

(a) *Methods.* All Class X or Class Y weighing, checkweighing, checkloading, stowage examination, and other weighing services shall be performed by official personnel or approved weighers using approved weighing equipment and according to procedures prescribed in the regulations and the instructions.

(b) *Order of service.* Weighing services shall be performed, to the extent practicable, in the order in which requests are received. Official personnel must mark or stamp the date received on each written request for service. Precedence will be given to requests for weighing required by sections 5(a)(1) or 5(a)(2) of the Act.

[52 FR 6495, Mar. 4, 1987]

§ 800.96 Weighing procedures.

(a) *Inbound.* Inbound grain that is to be weighed must be routed directly from the carrier and cannot be cleaned, dried, or otherwise processed to remove or add other grain or material en

¹Elevators, other handlers of grain, and their agents are responsible for the additive's proper usage and application. Compliance with this section does not excuse compliance with applicable Federal, State, and local laws.

route. Except as noted in paragraph (c) of this section, the identity of an inbound lot shall be considered lost when a portion of the lot is transferred or otherwise removed prior to weighing or a portion of grain or other material is added to the lot prior to weighing. When loss of identity occurs, no amount shall be shown in the "Net Weight" portion of the weight certificate for the lot.

(b) *Outbound*. Outbound grain that has been weighed must be routed directly from the scale to the carrier and cannot be cleaned, dried, or otherwise processed to remove or add other grain or material en route. Except as noted in paragraph (c) of this section, the identity of an outbound lot will be considered lost if a portion of the lot is transferred or otherwise removed from the lot after weighing or a portion of grain or other material is added to the lot after weighing. When loss of identity occurs, no amount shall be shown in the "Net Weight" portion of the weight certificate for the lot.

(c) *Exceptions*. (1) *Spills*. (i) *Outbound*. (A) *Replaced*. If a spill occurs in handling and loading of outbound grain and the spilled grain is retrieved, or is replaced in kind, and is loaded on board during the loading operations, the weight certificate shall show the weight of the grain that was physically loaded on board. Upon request of the applicant, an additional certificate may be issued by the agency or the field office to show the weight of the additional grain that was used to replace a spill.

(B) *Not replaced*. If a spill occurs in the handling and loading of outbound grain and the spilled grain is not retrieved or is not replaced during the loading operation, the weight certificate shall show the weight of the grain that was actually weighed, minus the estimated amount of the grain that was spilled. Upon request of the applicant, an additional certificate may be issued showing the estimated amount of grain that was spilled. The applicant may, upon request, have the total amount that was weighed shown on the weight certificate with the estimated amount of the spilled grain noted.

(ii) *Inbound*. If a spill occurs in the handling of inbound grain and the

grain is not retrieved and weighed, the weight certificate shall show the weight of the grain that was actually unloaded from the carrier and a statement regarding the spill as prescribed in the instructions.

(2) *Additives*¹. If additives are applied during loading to outbound, including export, grain after weighing or during unloading to inbound grain before weighing for the purpose of insect or fungi control, dust suppression, or identification, the weight certificate shall show the actual weight of the grain after the application of the additive for inbound grain or the actual weight of the grain prior to the application of the additive for outbound or export grain and a statement showing the type and purpose of the additive application, except that no statement is required to be shown when the additive is a fumigant applied for the purpose of insect control.

(3) *Dust*. If dust is removed during the handling of grain, the weight certificate shall not be adjusted to reflect the weight of the removed dust.

(4) *Commingle carriers*. If grain from two or more identified carriers becomes mixed, (i) the combined weight of the grain shall be shown in the "Net Weight" block of one certificate with all carrier identification shown in the identification of carrier section of the certificate, or (ii) upon request of the applicant, a certificate shall be issued for each carrier with the "Net Weight" block crossed out, and with the total combined weight unloaded and the identification of the other carrier(s) shown in the "Remarks" section.

(5) *Unremoved grain*. If, after unloading an inbound carrier, there is sound grain remaining in the carrier that could have been removed with reasonable effort, the weight certificate shall show the weight of the grain that was actually unloaded from the carrier and

§ 800.97

7 CFR Ch. VIII (1–1–04 Edition)

a statement regarding the grain remaining in the carrier.

[52 FR 6495, Mar. 4, 1987, as amended at 58 FR 3212, Jan. 8, 1993; 59 FR 52077, Oct. 14, 1994]

§ 800.97 Weighing grain in containers, land carriers, barges, and shiplots.

(a) *General.* The weighing of grain loaded or unloaded from any carrier shall be conducted according to this section and the instructions.

(b) *Procedure.* (1) *General.* If grain in a carrier is offered for inspection or weighing service as one lot, the grain shall be weighed and certificated as one lot. The identification of the carrier shall be recorded on the scale tape or ticket and the weight certificate.

(2) *Sacked grain.* If sacked grain is offered for weighing and the grain is not fully accessible, the request for weighing service shall be dismissed.

(3) *Part lots.* If a portion of an inbound lot of grain is unloaded and a portion is left in the carrier because it is not uniform in quality or condition, or the lot is unloaded in other than a reasonably continuous operation, the portion that is removed and the portion remaining in the carrier shall be considered as part lots and shall be weighed and certificated as part lots.

(c) *Certification of trucklots, carlots, and bargelots.* (1) *Basic requirement.* One official certificate shall be issued for the weighing of the grain in each truck, trailer, truck/trailer(s) combination, railroad car, barge, or similarly sized carrier. This requirement shall not be applicable to grain weighed as a combined lot under § 800.98.

(2) *Part-lot weight certificates.* A part-lot weight certificate shall show (i) the weight of the portion that is unloaded and (ii) the following statement: "Part-lot: The net weight stated herein reflects a partial unload."

(d) *Certification of shiplot grain.* (1) *Basic requirement.* The certificate shall show (i) if applicable, a statement that the grain has been loaded aboard with other grain, (ii) the official weight, (iii) the stowage or other identification of the grain, and (iv) other information required by the regulations and the instructions.

(2) *Common stowage.* (i) *Without separation.* If bulk grain is offered for weighing as it is being loaded aboard a

ship and is loaded without separation in a stowage area with other grain or another commodity, the weight certificate for the grain in each lot shall show that the lot was loaded aboard with other grain or another commodity without separation and the relative location of the grain.

(ii) *With separation.* If separations are laid between adjacent lots, the weight certificates shall show the kind of material used in the separations and the location of the separations in relation to each lot.

(iii) *Exception.* The common stowage requirements of this paragraph shall not be applicable to the first lot in a stowage area unless a second lot has been loaded, in whole or in part, in the stowage area before issuing the official weight certificate for the first lot.

(3) *Official mark.* If the grain is officially weighed in a reasonably continuous operation, upon request by the applicant, the following statement may be shown on the weight certificate: "Loaded under continuous official weighing."

[52 FR 6496, Mar. 4, 1987]

§ 800.98 Weighing grain in combined lots.

(a) *General.* The weighing of bulk or sacked grain loaded aboard, or being loaded aboard, or unloaded from two or more carriers as a combined lot shall be conducted according to this section and the instructions.

(b) *Weighing procedure.* (1) Single lot weighing. Single lots of grain that are to be weighed as a combined lot shall be weighed in one location. The grain loaded into or unloaded from each carrier must be weighed in accordance with procedures prescribed in the instructions. In the case of sacked grain, a representative weight sample shall be obtained from the grain in each carrier unless otherwise specified in the instructions.

(2) *Recertification.* Grain that has been weighed and certificated as two or more single lots may be recertificated as a combined lot provided that (i) the grain in each single lot has been weighed in one location, (ii) the original weight certificates issued for the single lots have been or will be surrendered to the appropriate agency or field
